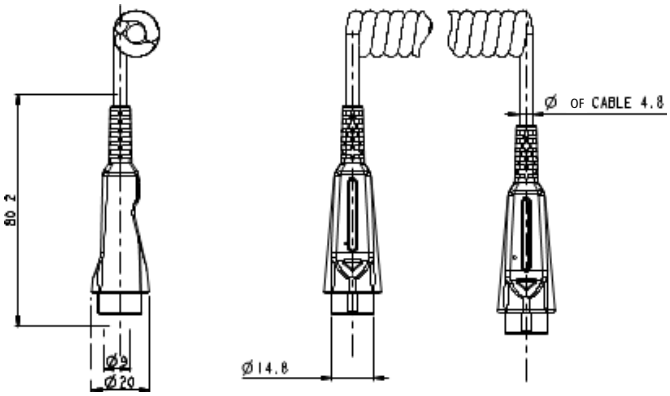
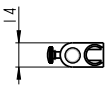
Cable



Part No.	Description
CSM	Min-DIN cable / min-DIN for probe 45 cm coil length 2 m useful length

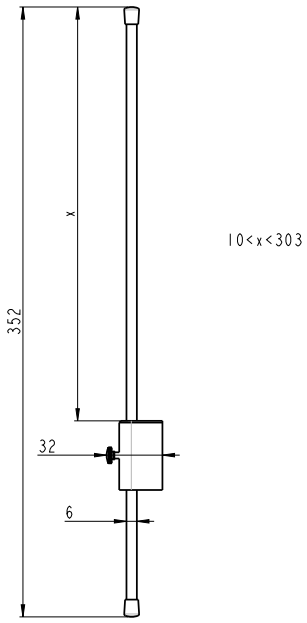
Adjustable rod



The adjustable rod is used with telescopic vane probes, telescopic hotwire probes and multifunctions probes to perform air velocity, airflow or temperature measurements.
For instance, it allows to perform measurements in several points, keeping the same distance from the air vent outlet.

Référence	Description
PRST	Adjustable rod from 10 to 303 mm

Example of application



*All the accuracies indicated in this technical datasheet were stated in laboratory conditions, and can be guaranteed for measurements carried out in the same conditions, or carried out with calibration compensation
** The f2 and f3 coefficients are defined according to the French NF C 42-710 standard.

All dimensions specified on this document are indicated in millimetres.
All handles are made in ABS with a -40 to +85°C operating temperature.
